FRONT-END AND FULL-STACK SOFTWARE ENGINEER

Software Engineer with 4 years of experience building, testing, and supporting enterprise web applications at Microsoft. Strong experience with React, TypeScript, REST APIs, automated testing, production debugging, and staged releases for large-scale customer-facing products.

EXPERIENCE

Microsoft — Software Engineer, Dynamics 365 Contact Center
Redmond, WA | August 2022–Present

Intent Assist | January 2026–Present

- Develop full-stack AI-assisted workflows that use conversation context to provide response suggestions for enterprise customer-service agents.
- Build React and TypeScript interfaces, backend integrations, and REST-based workflows across Dynamics 365 and third-party CRM environments.
- Created Playwright MCP test coverage and automated recurring validation for first-party and third-party scenarios, reducing manual effort and improving release confidence.
- Diagnose issues across frontend, backend, and integration layers using telemetry, KQL, and live debugging; implement fixes and improve customer-facing error handling.

Conversation Control | August 2022–December 2025

- Served as primary frontend engineer for Direct Transfer and Consult to Queue, two enterprise workflows supporting agent transfers and queue-based collaboration.
- Built responsive applications using React, TypeScript, Redux, HTML, and CSS, integrated with backend services and REST APIs.
- Owned features from technical design through implementation, unit testing, code review, accessibility review, feature flags, staged rollout, and production monitoring.
- Developed and maintained tests with Jasmine and Jest to validate components, business logic, integrations, and user interactions.
- Triaged 20–30 production issues during on-call rotations using KQL, telemetry, and live debugging, resolving defects and coordinating follow-up improvements.
- Supported global rollout and adoption across enterprise customers including T-Mobile, HP, Xiaomi, and Lenovo.

SKILLS

Languages: TypeScript, JavaScript, C#, Python, Java, SQL
Frontend: React, Redux, HTML, CSS, responsive web development
Backend/Data: Node.js, REST APIs, service integrations, SQL
Testing/Delivery: Jest, Jasmine, Playwright MCP, CI/CD, Git, code reviews
Operations: KQL, telemetry, production debugging, staged deployments, accessibility, Agile, Claude

EDUCATION

University of Washington — Seattle, WA | September 2018 - June 2022
B.S. in Human-Centered Design & Engineering, Human-Computer Interaction Option
Minor in Informatics | GPA: 3.78
